Albert Hall in Launceston

LOCALITY

Launceston is the second largest city in Tasmania and its central location makes it the ideal base to explore the north of the state. Discover hidden arcades and malls and revel in Launceston's café scene.

There are a number of quaint towns within a short drive of Launceston; Campbell Town, Ross and Evandale to name but a few. Each town is rich with history and well worth exploring. Launceston itself, has perhaps the greatest proportion of beautiful, historic buildings of any city in Australia. George Town, on the banks of the Tamar River and just north of Launceston is the third oldest settlement in Australia and has a rich maritime history.

Cataract Gorge is probably Launceston's best known attraction and rightly so; it is within 15 minutes' walk of the CBD and is both naturally beautiful and historically interesting. Launceston is also the ideal base from which to tour the Tamar Valley vineyards, which include some of the finest cool climate wineries in Australia.
